## Green List

#### **International Narcotics Control Board**

30th edition, 2019 Annex to the annual statistical report on psychotropic substances (form P)

# List of Psychotropic Substances under International Control

In accordance with the Convention on Psychotropic Substances of 1971

#### **UPDATES**

• Inclusion of 5 new substances in Schedule II: ADB-CHMINACA, ADB-FUBINACA, CUMYL-4CN-BINACA, *N-ETHYLNORPENTYLONE* and FUB-AMB.

The Green List has been prepared by the International Narcotics Control Board to assist Governments in completing the annual statistical report on psychotropic substances (form P) and the quarterly statistics of imports and exports of substances in Schedule II of the Convention on Psychotropic Substances of 1971 (form A/P). For information on the names used for substances under international control and preparations containing such substances, as well as on chemical and structural formulae and other technical information, see *Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control*. 1

<sup>&</sup>lt;sup>1</sup> United Nations publication, Sales No. M.06.XI.16.

#### The Green List is divided into three parts:

Part one. Substances in Schedules I, II, III and IV of the Convention on Psychotropic Substances of 1971;

Part two. Pure drug content of bases and salts of psychotropic substances under international control;

Part three. Prohibition of and restrictions on export and import pursuant to article 13 of the Convention on Psychotropic Substances of 1971.

## Part one. Substances in Schedules I, II, III and IV of the Convention on Psychotropic Substances of 1971

Psychotropic substances under international control are presented in the schedules below. Where an international non-proprietary name (INN) is available for a substance, that INN is given in the left-hand column. Where no INN is available, the non-proprietary or trivial names of the substance are given in the second column of the table. Where a trivial name is commonly applied to a substance with a given INN, then the trivial name is also given in the second column. Salts of all the substances covered by the four schedules, whenever the existence of such salts is possible, are also under international control.

For other names, synonyms or trade names apply either to pure psychotropic substances, the salts of psychotropic substances or to preparations containing either the pure substance or its salt form, see *Multilingual Dictionary of Narcotic Drugs and Psychotropic Substances under International Control*.<sup>2</sup>

The following interpretation guidelines<sup>3</sup> concerning the stereoisomers of substances in Schedules II, III and IV of the 1971 Convention<sup>4</sup> were developed, pursuant to Commission on Narcotic Drugs decision 42/2, in order to clarify the scope of control of stereoisomers of substances in those schedules:

- (a) When the substance listed can exist as stereochemical variants the following should apply:
  - (i) If the chemical designation of the substance used in the 1971 Convention (or in a subsequent scheduling decision of the Commission on Narcotic Drugs) does not include any stereochemical descriptors or indicates a racemic form of the substance:
  - a. If the molecule contains one chiral centre, both the *R* and *S*-enantiomers and the *RS*-racemate are controlled, unless specifically excepted by a decision of the Commission on Narcotic Drugs;
  - b. If the molecule contains more than one chiral centre, all the diastereoisomers and their racemic pairs are controlled, unless specifically excepted by a decision of the Commission on Narcotic Drugs;
  - (ii) If the chemical designation used in the 1971 Convention (or in a subsequent scheduling decision of the Commission on Narcotic Drugs) for the substance which contains one chiral centre in the molecule includes a stereochemical descriptor indicating a specific enantiomer, the racemic form of the substance is also controlled, unless specifically excepted by a decision of the Commission on Narcotic Drugs, while the other enantiomer is not controlled;
  - (iii) If the chemical designation used in the 1971 Convention (or in a subsequent scheduling decision of the Commission on Narcotic Drugs) for the substance which contains more than one chiral centre in the molecule includes stereochemical descriptors indicating a specific diastereoisomer, only that diastereoisomer is controlled;
- (b) When one enantiomer is controlled, then a mixture of that enantiomer with the other enantiomeric substance is controlled;
- (c) The chemical designations and INNs used in the scheduling decisions to define substances in Schedules II, III and IV of the 1971 Convention were considered appropriate at the times when such decisions were made. It should be understood that:
  - (i) Alternative chemical designations constructed according to modified chemical nomenclature rules may be used in official documents as long as they preserve the stereospecificity when appropriate;
  - (ii) If any subsequent modification of an INN definition uses a chemical designation which is different to that in the scheduling decision, such an INN should be omitted from official documents.

<sup>&</sup>lt;sup>2</sup> United Nations publication, Sales No. M.06.XI.16.

<sup>&</sup>lt;sup>3</sup> The guidelines are also applicable to the stereoisomers of substances in Schedule I, whenever the existence of such stereoisomers is possible within the specific chemical designation, which are under international control unless specifically excepted by a decision of the Commission on Narcotic Drugs.

<sup>&</sup>lt;sup>4</sup> WHO Expert Committee on Drug Dependence: Thirty-second Report, WHO Technical Report Series No. 903 (Geneva, World Health Organization, 2001), annex.

In order to facilitate rapid identification of all scheduled psychotropic substances, CAS (Chemical Abstracts Service) registry numbers were included for the most traded substances (Schedule II, III and IV substances) and their salts. The list is not exhaustive and the absence of a CAS number does not mean that it does not exist but rather that it was not available at the time of the update of the list. CAS numbers were included in the following cases:

- (i) The substance under international control exists in the base form and stereoisomer variants do not exist, i.e., it is a unique CAS number.
- (ii) If stereoisomers exist within the specific chemical designation: if stereoisomers and racemic mixture are already listed and related CAS numbers are available (example: amphetamine, dexamfetamine and levamfetamine).

#### Substances in Schedule I

IDS codes	International non-proprietary name	Other non-proprietary or trivial names	Chemical name
PD 009	BROLAMFETAMINE	DOB	(±)-4-bromo-2,5-dimethoxy-α-methylphenethylamine
PC 010	CATHINONE		(–)-(S)-2-aminopropiophenone
PD 001		DET	3-[2-(diethylamino)ethyl]indole
PD 007		DMA	(±)-2,5-dimethoxy-α-methylphenethylamine
PD 003		DMHP	3-(1,2-dimethylheptyl)-7,8,9,10-tetrahydro-6,6,9-trimethyl-6 <i>H</i> -dibenzo[ <i>b</i> , <i>d</i> ]pyran-1-ol
PD 004		DMT	3-[2-(dimethylamino)ethyl]indole
PD 008		DOET	(±)-4-ethyl-2,5-dimethoxy-α-methylphenethylamine
PP 003	ETICYCLIDINE	PCE	<i>N</i> -ethyl-1-phenylcyclohexylamine
PE 006	ETRYPTAMINE		3-(2-aminobutyl)indole
PL 002	(+)-LYSERGIDE	LSD, LSD-25	9,10-didehydro- <i>N</i> , <i>N</i> -diethyl-6-methylergoline-8 <i>β</i> -carboxamide
PN 005		N-hydroxy MDA	$(\pm)$ - $N[\alpha$ -methyl-3,4-(methylenedioxy)phenethyl]hydroxylamine
PN 004		MDE, <i>N</i> -ethyl MDA	$(\pm)$ -N-ethyl- $\alpha$ -methyl-3,4-(methylenedioxy)phenethylamine
PM 011		MDMA	$(\pm)$ - $N,\alpha$ -dimethyl-3,4-(methylenedioxy)phenethylamine
PM 004		mescaline	3,4,5-trimethoxyphenethylamine
PM 019		methcathinone	2-(methylamino)-1-phenylpropan-1-one
PM 017		4-methylaminorex	(±)-cis-2-amino-4-methyl-5-phenyl-2-oxazoline
PM 013		MMDA	5-methoxy-α-methyl-3,4-(methylenedioxy)phenethylamine
PM 020		4-MTA	α-methyl-4-methylthiophenethylamine
PN 006	25B-NBOMe	2C-B-NBOMe	2-(4-bromo-2,5-dimethoxyphenyl)- <i>N</i> -(2-methoxybenzyl)ethanamine
PN 007	25C-NBOMe	2C-C-NBOMe	2-(4-chloro-2,5-dimethoxyphenyl)- <i>N</i> -(2-methoxybenzyl)ethanamine

## Part three. Prohibition of and restrictions on export and import pursuant to article 13 of the Convention on Psychotropic Substances of 1971

The Secretary-General has transmitted notifications concerning the prohibition of the importation of specific substances in Schedules II, III and IV of the 1971 Convention that were received from the countries listed below. In the first table presented below, the notifying countries are listed alphabetically, followed by the names of the prohibited substances and dates of notification. In the second table presented below, the prohibited substances are listed alphabetically, followed by the names of the notifying countries. The prohibitions are effective, with respect to exporting countries, as at the date of receipt of the Secretary-General's notification.

#### Note to exporting countries

Upon notification of a prohibition, a country must take measures to ensure that none of the substances specified in the notification is exported to the notifying country or any of its regions. Exports of the prohibited substance may be permitted only when a special import licence has been issued by the notifying country, in accordance with the provisions of article 13 of the 1971 Convention.

### Notifications concerning the prohibition of and restrictions on export and import pursuant to article 13 of the Convention on Psychotropic Substances 1971, by notifying country

Notifying country	Prohibited substance	Date of notification by the Secretary-General
Argentina	Mecloqualone	15 January 1987
-	Methaqualone	24 March 1982
Australia	Methaqualone	8 August 1980
Belize	Amfetamine	9 May 1989
	Dexamfetamine	
	Fenetylline	
	Levamfetamine	
	Levomethamphetamine	
	Mecloqualone	
	Metamfetamine	
	Metamfetamine racemate	
	Methaqualone	
	Methylphenidate	
	Phencyclidine (PCP)	
	Phenmetrazine	
	Secobarbital	
Bulgaria	Amfetamine	12 August 1993
	Dexamfetamine	
	Fenetylline	
	Levamfetamine	
	Metamfetamine	
	Metamfetamine racemate	
Chile	Glutethimide	1 July 1981
	Lefetamine (SPA)	
	Mecloqualone	
	Methaqualone	
	Phencyclidine	
	Phenmetrazine	
Colombia	Methaqualone	11 November 1981
Gabon	Methaqualone	28 July 1993
Iceland	Phencyclidine	28 November 1979

Notifying country	Prohibited substance	Date of notification by the Secretary-General
ndia	Amfepramone	30 May 1991
	Aminorex	27 October 2005
	Benzfetamine	30 May 1991
	Bromazepam	
	Brotizolam	27 October 2005
	Camazepam	30 May 1991
	Clotiazepam	
	Cloxazolam	
	Delorazepam	
	Estazolam	
	Ethinamate	
	Ethyl loflazepate	
	Fludiazepam	
	Flunitrazepam	
	Haloxazolam	
	Ketazolam	
	Lefetamine (SPA)	
	Loprazolam	
	Lormetazepam	
	Mazindol	
	Medazepam	
	Mesocarb	27 October 2005
	Methaqualone	30 April 1993
	Methyprylon	30 May 1991
	Oxazolam	30 May 1991
	Phendimetrazine	
	Pinazepam	30 May 1991
	Pipradrol	
	Prazepam	
	Temazepam	
	Tetrazepam	
apan	Amfetamine	31 January 1991
	Dexamfetamine	
	Levamfetamine	
	Levomethamphetamine	
	Metamfetamine	
	Metamfetamine racemate	
atvia	Amfetamine	7 November 1995
	Cathine	
	Dexamfetamine	
	Etilamfetamine	
	Fenetylline	
	Fenproporex	
	Levamfetamine	

Notifying country	Prohibited substance	Date of notification by the Secretary-General
Latvia (continued)	Metamfetamine	
	Metamfetamine racemate	
	Phentermine	
Lebanon	Amfetamine	16 October 2000
	Benzfetamine	21 August 2007
	Cathine	16 October 2000
	delta-9-tetrahydrocannabinol	10 October 2000
	Dexamfetamine	
	Fenetylline	
	Flunitrazepam	21 August 2007
	Levamfetamine	
		16 October 2000
	Levomethamphetamine	
	Mecloqualone	
	Metamfetamine  Metamfetamine racemate	
	Methaqualone Phencyclidine
